

George Gorospe

NASA

George Gorospe attended and received degrees from Dartmouth College, in Hanover, NH, and the University of New Mexico, in Albuquerque, NM. George joined NASA Ames Research Center in Moffett Field, CA in 2012 and is a member of the Diagnostics and Prognostics Research Group within the Intelligent Systems Division.

He is currently the manager of the Systems Health Analytics, Resilience, and Physics modeling (SHARP) laboratory, where he leads the design and development of novel testbeds and automated test systems benefitting the development and maturation of diagnostic, prognostic, and health aware autonomy methods. His research interests include automated test systems, electric propulsion systems, robotic exploration systems, and hardware accelerated computing.
