RAL SEMINAR SERIES

Leveraging Exascale Technology to Advance NSF NCAR Science within RAL

JOHN DENNIS

Computer Information and Systems Laboratory (CISL)
NSF National Center for Atmospheric Research

Wednesday, January 17, 2024
1:00 PM - 2:00 PM (MT)
HYBRID MEETING FL2-1022 | Watch Live

An institution-wide team was formed to determine the best course of action concerning using exascale technology to advance NSF NCAR's science objectives. The end product of this evaluation was the creation of both a general and laboratory-specific set of recommendations regarding how exascale technology can advance our science objectives. In our presentation, we describe science objectives that are potentially of interest to the RAL community that can benefit from the use of exascale technology. We also provide both NSF NCAR-wide and laboratory-specific recommendations to advance the RAL community's use of exascale technologies.
