

# AI in Geoscientific Analysis

Date: Tuesday, June 24<sup>th</sup>

Location: FL2-1001-Small Seminar Room, FL2-1002, and FL2-1003, and Hybrid

Time: 1:00 – 3:00

Organizer: Curtis Walker ([walker@ucar.edu](mailto:walker@ucar.edu))

No Experience Necessary – Staff & Students Welcome!

Explore the transformative world of Artificial Intelligence by analyzing data from weather events. Discover the next wave of opportunities in Scientific AI, including generative models, and learn how to seamlessly incorporate these tools into your workflow. We will also explore the new MATLAB Copilot and review open-source integration.
