Weather Training

Rick Heuwinkel, Manager (A)

Aviation Weather Division

August 8, 2012

Weather Training Is:

- **Critical to effective operational decision making**
- **Complex**
- **Expensive, especially in terms of taking controllers, dispatchers, and pilots off position or flight deck**
- **Often under funded, because of 2 & 3 above**

AND/OR

- **Conducive to highly intuitive Decision Support Tools to reduce training time/costs**

Aviation Weather Training Activities

- **Aviation Weather Division in NextGen is initiating a small service analysis effort to:**
 - **Assess current level of controller training – the “as is”**
 - **Identify high level training needs in a NextGen context of automated/semiautomated Decision Support Tools -- the “to be” state.**
 - **Assess the gap**
- **ATO components continue to assess, develop and conduct near-term operational training**
- **NWS continues to provides important weather training support to FAA**
